

## About Me

I was born in 2003 in Iran. I bought my first computer when I was 8 years old. I was very interested in it and did interesting things like photo editing with it. **At the age of 14, I became acquainted with programming** and felt that this was what I was **talented** at, so I started learning **Android programming only through Google and without a teacher or boot camp**. After a while, I developed and published several apps. But after about two years because of more interest in JavaScript I decided to change my stack. I have been working and **enjoying Front-End** for about two years now.

## Contact

2003 Jan 27
